ERP - What you need to know!

Baxi

The Energy related Products Directive (ErP) was put in place to help the EU achieve its 20-20 target to lower emissions by 20% and increase the share of renewable energies by 20% by 2020. Boilers and heating systems will be labelled in the same way that white goods like fridges and freezers are, with the aim of improving efficiency.

From 26 September 2015, the ErP directive will affect most heating and hot water products with an output $\leq 400\text{kW}$.

So, join Baxi in this FREE seminar and learn first hand about the Baxi ErP calculation tool and how you carry out calculations.

To book your FREE seminar place call: 0121 711 5030 or email: marketing@aphc.co.uk your full name & contact details.

Be prepared
ErP is coming, Baxi can help you get ready.

BAXI
Make it easy

Energy Related Products

The Energy-related Products directive will be implemented on 26th September 2015.
Baxi will have a dedicated ErP helpline to answer any of your queries.

Dedicated ERP helpline 0344 871 1545

If you're unsure about ErP and want to know how it affects you, come to one of our free hands-on product training days.

Free ErP training baxi.co.uk/training

As an installer you will be responsible for providing your customers with the relevant product label.
To make it easy Baxi have an online calculation tool to help you.
